I think that AI benefitted my learning because it helped to refine my ideas as well as introduce new ones that I hadn't thought about. Especially when creating the WBS and breaking down the different components of work we had to do, I think that it helped to narrow down the scope of work and make it more specific.

For Milestone 1, most of the questions I asked AI had less to do with correctness but more to do with making my main points more clear or fixing clarification. My group members and I all went over our work with each other to make sure we were all okay with it.
